Aryan Singh
Period 6
<center>Project Journal</center>

11/29/21
- Formed a group with Max Shigapov and Waleed Yagoub and decided roles
    - Content Specialist: Waleed Yagoub
    - Web Master: Aryan Singh
    - Database Specialist: Max Shigaopov
- Brainstormed ideas about potential websites
    - Food Delivery
    - Movie Viewing Times
    - Game
    - Hotel
- Started learning about Git independently

12/1/21
- Collectively decided to build a website about hotels, where users could browse different room options and amenities and ultimately book the room they like the best.
- Brainstormed different webpages
    - Main Menu
    - Amenities
    - History
    - Bookings
- Learned how to use GitBash to commit and update the repository

12/3/21
- Learned more about GitBash and became comfortable with pushing/pulling
- With the repository up and running, we all began our individual webpages.
- Compiled a massive list of potential pictures we could use.

12/6/21
- Tried to create our own hotel brand that branched out and sponsored different things - decided the idea would not work.
- Researched inline, internal, and external CSS

12/8/21
- Individually worked on our respective webpages
- Researched how to create different divs and format websites
- Learned how to use JS to create an interactive calendar.

12/10/21
- Brainstromed different ways that we could incorporate user input for the PHP portion of the project.

- Decided that a bookings webpage where the user could select which room they would like to stay in and when would be good
- Learned more about HTML/CSS syntax from w3schools

12/13/21
- Substantial, concrete progress on our respective webpages
- I started creating different divs and formatted my webpage according to the storyboard
- Established a constant color scheme and coordinated with group members about the appearance of the website
- Completed a quarter of the html file (I only committed by webpage at the end because no one else was going to work on it)

12/15/21
- Finished html file and started working on the CSS
- Collaborated with Waleed to establish divs on a separate webpage
- Collaborated with Waleed to find more pictures and visuals
- Learned more about different CSS commands from w3 schools

12/17/21
- Completely finished the CSS
- Optimized the JS file for the interactive calendar
- Colloborated with Waleed to finalize different aspects of the website, such as images and where certain divs were located
- Researched php
