Waleed Yagoub

Period 6

<div align="center">Waleed: Project Journal</div>

11/29/21

- Formed a group with Max Shigapov and Waleed Yagoub and decided roles
    - Content Specialist: Waleed Yagoub
    - Web Master: Aryan Singh
    - Database Specialist: Max Shigaopov
- Brainstormed ideas about potential websites
    - Food Delivery
    - Movie Viewing Times
    - Game
    - Hotel
- Watched Gitbash videos (learned cd, ls, etc)

12/1/21

- Decided to do a hotel interface called "Hotel Pinnacle," it basically gives people a variety of different rooms and details different amenities each room offers.
- Brainstormed different webpages
    - Main Menu
    - Amenities
    - History
    - Bookings
- Started experimenting with GitBash and committing to the repo as a trial

12/3/21

- With Aryan, we searched up high quality hotel pictures that fit with our aesthetic and uploaded a wide array of pictures to the repo

12/6/21

- Started working on the main webpage - different sized divs to meet the size of the individual pictures

12/8/21

- Individually worked on our respective webpages
- Fully created the divs and started pasting images.
- Inline/outline css and coordinated with team members to create a constant color scheme

12/10/21

- Learned more about HTML/CSS syntax from w3schools and YouTube
- Helped Aryan create a div template that was consistent with the rest of the webpages
- Brainstormed more about potential ways to include PHP

12/13/21

- Completed my website and started committing changes to the repl
- Starting updating the CSS elements
- Formatted top and bottom margins to create a uniform structure

12/15/21

- Finished CSS and helped Max and Aryan establish their css components so that the colors matched
- Learned more about different CSS commands from w3 schools and YouTube

12/17/21

- Finalized CSS and HTML files and linked them with partners' pages
- Finished the journal
